# Managing your profile information and passwords

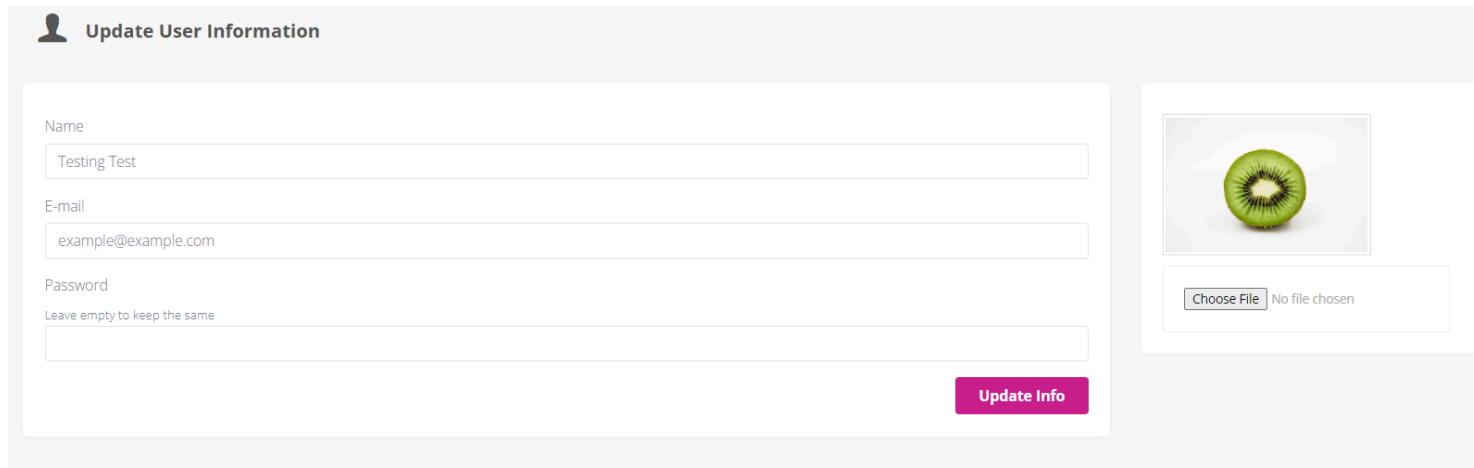

Click on the icon at the top right of the screen to find your user information, and click on 'Profile' to view and edit your profile information.

<https://affinity-flooring.com/admin/profile>

You will then be prompted to click the magenta 'Edit My Profile' button to continue.

You can update your information and change your password, and upload a profile picture if you wish. If you are uploading a profile picture only the formats of: **jpeg, jpg, gif and png** will work.

**Update User Information**

Name  
Testing Test

E-mail  
example@example.com

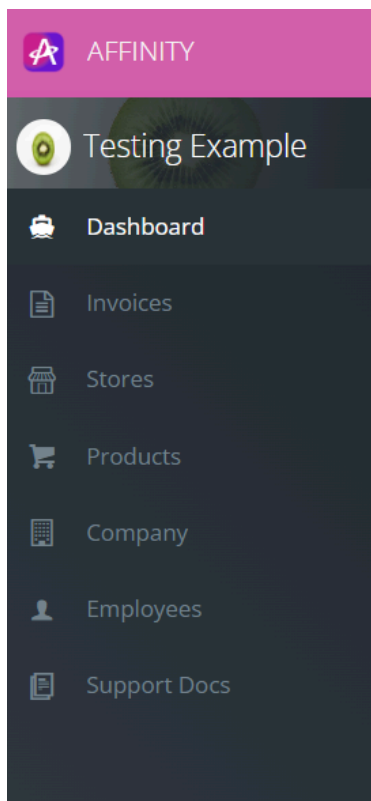

Password  
Leave empty to keep the same

**Update Info**

Choose File No file chosen

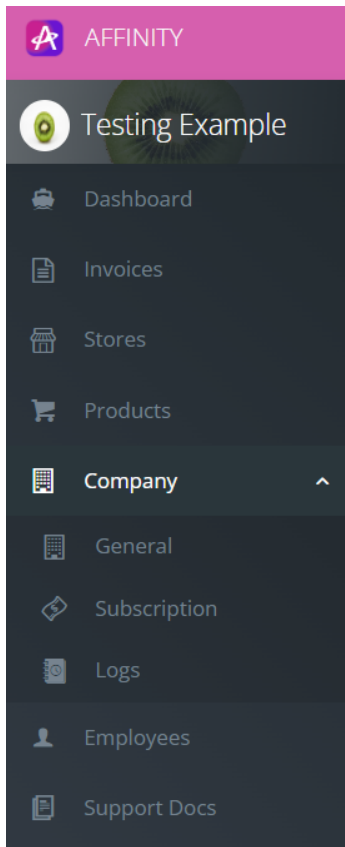

When you've finished editing your information, click the magenta 'Update User Information' button to save your changes.

You can navigate to other sections of the Affinity system by hovering your mouse over the dark grey left-hand panel:

# Manage company details and your Affinity subscription

Select the 'Company' option from the left-side panel.

From here you can click on either general, subscription or logs.

# General section

<https://affinity-flooring.com/admin/company>

You will be able to amend the default company details including setting your VAT percentage. This will default to 20% but you can amend if it differs.

This section will display a history of recent log-ins and user activities, that you can use to identify where any errors or unexpected actions might have occurred.

# Manage stores

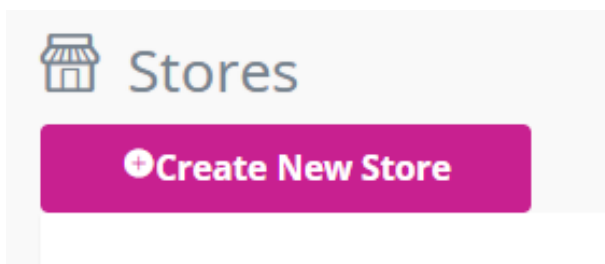

<https://affinity-flooring.com/admin/stores>

Select 'Stores' from the panel at the left of the screen.

The store that you have used to register with will be set as default and will automatically show here. Should you have any other stores you wish to add this is the section to do so. Store information can be edited and/or deleted by selecting the 'edit' or 'delete' buttons for each entry.

Click the magenta 'Create New Store' button to add a new store.

Add the store information and a logo (if not already inputted) to continue, and click 'Save Store' to complete the process.

## Store Assigned Employees

Employee Name

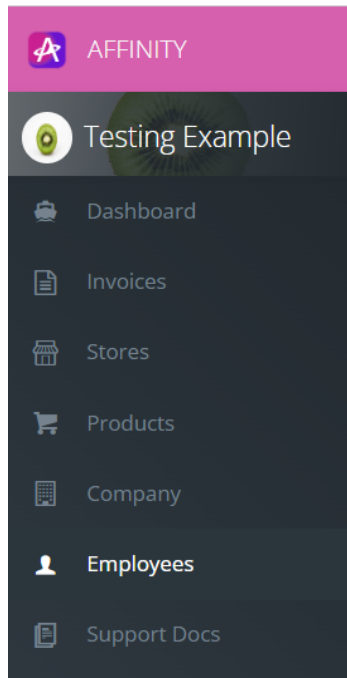

Once you have created the store you will then be able to assign users (employees) to the correct store once you have created an employee below.

# Manage employees

<https://affinity-flooring.com/admin/employee>

Select 'Employees' from the left-side menu.

Click the 'Add New Employee' button to set up a new user (employee). Please remember you will only be able to add 3 users to this section if you have not selected the additional user part of your subscription.

 **Add New Employee for Testing Example**

|                               |                                                  |                                                                                                         |
|-------------------------------|--------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Name                          | Email Address                                    | Select Store                                                                                            |
| <input type="text"/>          | <input type="text"/>                             | <div>Select a Store</div> <div>Select a Store</div> <div>Testing Test</div> <div>Confirm Password</div> |
| User Role                     | Password <input type="button" value="Generate"/> |                                                                                                         |
| <div>Select a User Role</div> | <input type="text"/>                             | <input type="text"/>                                                                                    |

Add the employee information and select the store they will be based at. Once completed click 'Save Employee' to complete this step.

| # | Name              | Email              | Created At                  |

Showing 1 to 3 of 3 entries

Once you have added an employee they will receive an email from the software to confirm they have been added as a user and to discuss further with their Company Super Admin.

You will as well be able to edit the users information by pressing the 'green button' and the 'red button' to delete.

Action

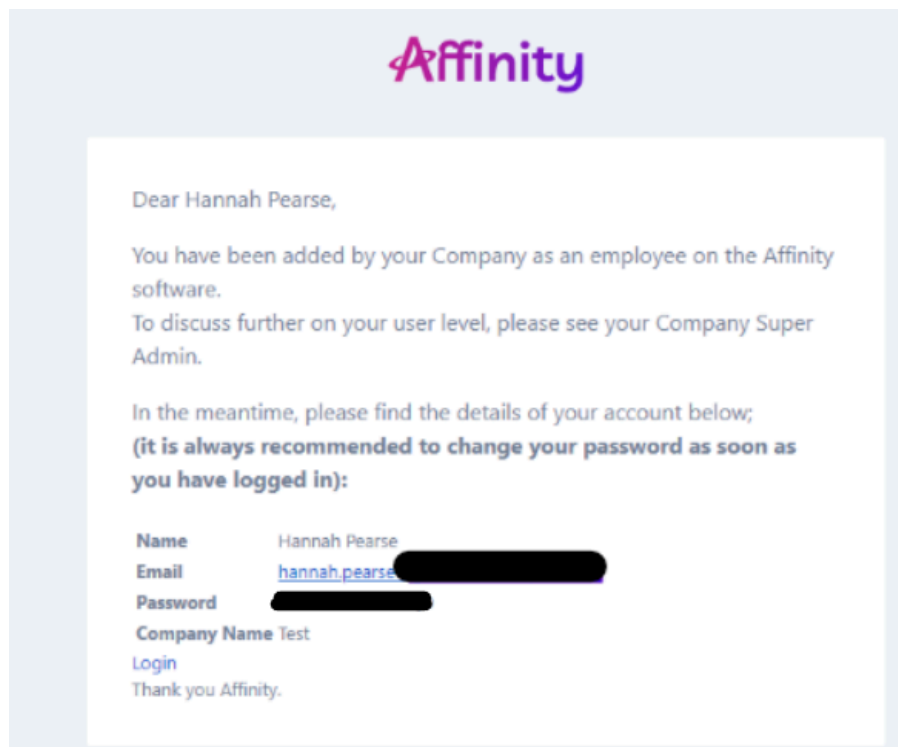

< Previous

1

Next >

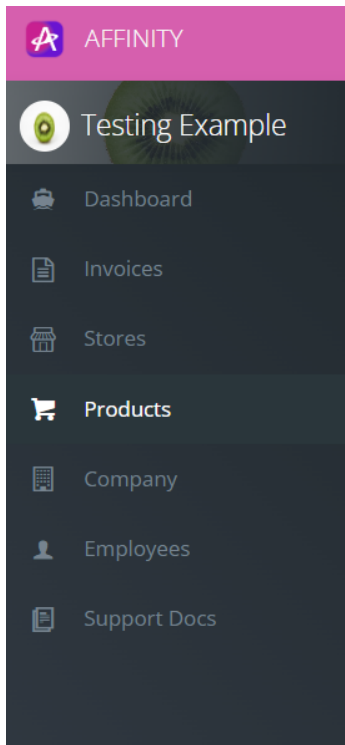

Their user login and password will be sent out in an email to them, so please make sure you are recommending them to update their password once logged in.

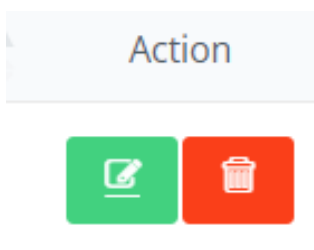

# Manage product items

<https://affinity-flooring.com/admin/products>

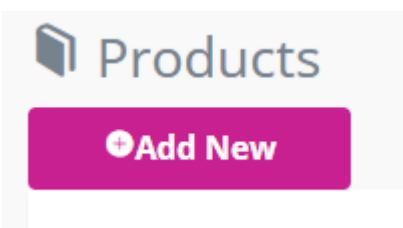

Select 'Products' from the left-side menu.

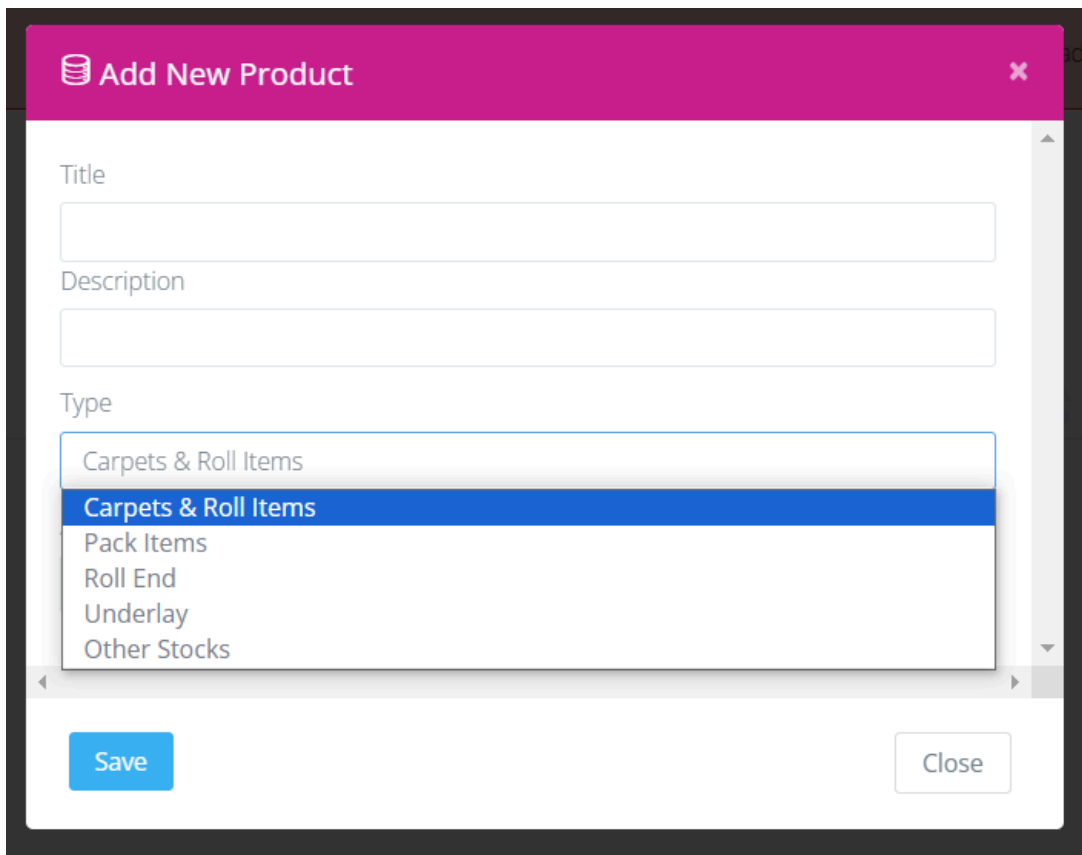

You can edit them by selecting the green 'edit' button, or you can remove an item altogether by clicking the red 'delete' button.

To add a new entry to the 'products' section please click on the '+Add New' on the top left hand side of the screen.

You will then be prompted with the below asking you to input the title of the product and select its type. Listed by default are: Carpet, Tiles, Roll End, Underlay and others. You can also select if the product is 'in stock' or 'out of stock'.

The screenshot shows a web form titled "Add New Product" with a magenta header bar. The form contains three input fields: "Title", "Description", and "Type". The "Type" dropdown menu is open, showing a list of options: "Carpets & Roll Items" (highlighted in blue), "Pack Items", "Roll End", "Underlay", and "Other Stocks". At the bottom of the form, there are two buttons: a blue "Save" button and a grey "Close" button.

Please note: the description section will transfer over onto the invoice screen and we recommend you to use this box on the invoicing screen only rather than the product section as it is editable. This means on the invoicing screen you can edit into this box what colour the customer wants, any of the product's specific details.

# How to guides

# To add a 'carpet & roll items'

| <input type="text" value="Unit Price(£)"/>         | <input type="text" value="15.99"/>                           | <input type="text" value="unitprice14205"/>   | <input type="text" value="hidden"/>   |  |
| <input type="text" value="Unit Area Size(LxW)m²"/> | <input type="text" value="1"/>                               | <input type="text" value="unitarea14206"/>    | <input type="text" value="hidden"/>   |  |
| <input type="text" value="Enter Room Location"/>   | <input type="text"/>                                         | <input type="text" value="location14213"/>    | <input type="text" value="editable"/> |  |
| <input type="text" value="formular"/>              | <input type="text" value="unitprice14205*carpetunits14214"/> | <input type="text" value="formular14215"/>    | <input type="text" value="hidden"/>   |                                                                                     |

[Add Product Attribute](#)

The 'Product Attributes screen will appear. This is where you can add your product attributes and ensure the calculation works correctly.

The field you will need to complete is:

- Unit Price per square metre

None of the other fields are required. The description box can be left empty. If completed, this information will transfer over to the invoicing screen. The description field in the invoicing screen can be used to add in carpet specifics for example, colour, specifics widths sold in etc. This allows the calculation over in the invoicing to be the below:

- LXW of customer room = total sqm required
- Total sqm required x Unit Price of carpet = £ Total price of carpet needed.

*This is all based on the carpet working on an area of per square metre, which is why in the product attribute section above the unit area size is as default the value of '1'.*

Once you have completed please press 'save product'.

**Examples of roll items: Carpet, Artificial Grass, Vinyl etc**

# To add a 'packed/tiled item'

| Name                  | Value                          | Identifier       | Display  | Action                                                                              |
|-----------------------|--------------------------------|------------------|----------|-------------------------------------------------------------------------------------|
| Title                 | Granite Stone                  | title33392       | readonly |  |
| Description           |                                | description33393 | readonly |  |
| Type of Product       | tile                           | type33394        | hidden   |  |
| Unit Price(£)         | 14.99                          | unitprice33395   | hidden   |  |
| Unit Area Size(LxW)m² | 96                             | unitarea33396    | hidden   |  |
| Allowance(%)          | 10                             | allowance33401   | hidden   |  |
| Enter Room Location   |                                | location33403    | editable |  |
| formular              | unitprice33395*packscount33406 | formular33407    | hidden   |                                                                                     |

When adding a packed/tiled product the fields you must complete differ to those of a carpet or roll item product. The fields you will need to enter into are:

- Unit Price of the pack
- Unit Area size of the pack
- Allowance (5%, 10%, 15% etc).

This will allow our calculation in the invoicing to be the below:

- $L \times W$  of customer = total sqm required
- $\text{Total sqm required} \div \text{Total sqm of the pack} = \text{how many packs required}$
- In the invoicing screen you tick the allowance button which will add the amount of allowance needed for this product, as listed above 10%.
- $\text{Total packs required} \times \text{Unit Price per pack} = \text{£ Total price of packs needed.}$

**Example of packed items: Laminate, Wooden Flooring, Tiles etc.**

# To add a 'roll end'

## Product Attributes

| Name                        | Value                  | Identifier       | Display  | Action                                                                              |
|-----------------------------|------------------------|------------------|----------|-------------------------------------------------------------------------------------|
| Title                       | Luxury Sephora         | title16232       | readonly |  |
| Description                 |                        | description16233 | editable |  |
| Type of Product             | rollend                | type16234        | hidden   |  |
| Total Area(m <sup>2</sup> ) | length16235*width16236 | totalarea16237   | readonly |  |
| Total Price(E)              | 0                      | totalprice16238  | editable |  |
| Enter Room Location         |                        | location16240    | editable |  |
| formular                    | totalprice16238        | formular16239    | hidden   |                                                                                     |

[Add Product Attribute](#)

To add a roll end product we understand that you are aware of the total price for the item not the sqm price, therefore you just need to add the product as listed above.

*You just need to leave the total price at 0.*

On the invoicing screen later explained you will see that you enter the customers length and width of the room which automatically calculates the total sqm required however you can then just input the total price and it adds to the rest of the invoice opposed to then multiplying the unit price by the customers total sqm required.

Should you wish to calculate roll end products the same for roll items or carpets, then you would just simply add the roll end as a carpet or roll item and the calculation will be correct.

# To add 'underlay'

## Product Attributes

| Name                  | Value                           | Identifier       | Display  | Action                                                                              |
|-----------------------|---------------------------------|------------------|----------|-------------------------------------------------------------------------------------|

[Add Product Attribute](#)

Save Product

Here adding underlay as a product is the exact same as carpet. The field you will need to complete is the Unit Price section per square metre. The calculation in the invoicing screen will be as below:

- LXW of customer room = total sqm required
- Total sqm required x Unit Price of underlay = £ Total price of underlay needed.

If you are giving them free underlay for example it is included, then you can edit the unit price over in the invoicing screen and make this 0 on that side but as default will be whatever value you enter in the product attribute section.

*This is all based on the underlay working on an area of per square metre, which is why in the product attribute section above the unit area size is as default the value of '1'.*

# To add 'other stocks'

[Add Product Attribute](#)

The example listed above is for Gripper Sticks. As you can see here the price for 1 is £15.00. This section is used for anything for just a set price.

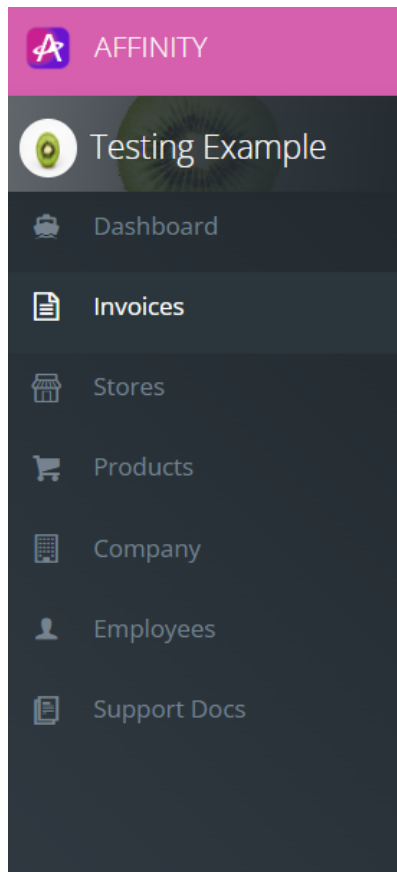

**Examples of other stocks: adhesive spray, gripper rods/sticks, pipe covers etc.**

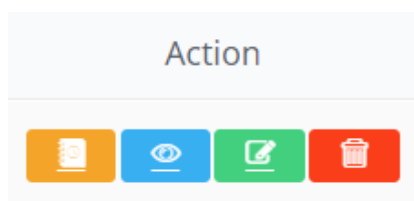

# Create a new invoice

<https://affinity-flooring.com/admin/invoices>

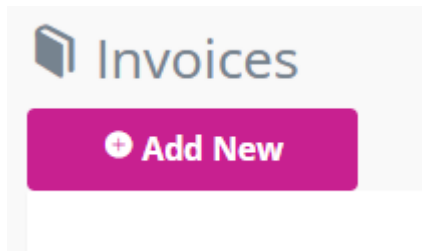

Select 'Invoices' from the left-hand panel.

All existing invoices for your company will be listed in this section. If you need to edit an existing invoice you can search for it here and edit it by clicking the green 'edit' button. If you need to preview the invoice click the 'blue' button. To delete, simply press the 'red' button and to see a history of the invoice and its amendments click on the 'orange' button.

Select the magenta 'Add New' to create a new invoice.

Fill in the basic customer and store details.

|                                            |                                                    |                                     |

| <input type="text" value="Henry Hill"/>    | <input type="text" value="testing@test.com"/>      |                                     |
| <b>Customer Phone Number</b>               | <b>Customer Address Line 1</b>                     | <b>Customer Address Line 2</b>      |
| <input type="text" value="0121 783 8223"/> | <input type="text" value="838 Washwood Heath Rd"/> | <input type="text"/>                |
| <b>Customer City</b>                       | <b>Customer Country</b>                            | <b>Customer Postcode</b>            |
| <input type="text" value="Birmingham"/>    | <input type="text" value="West Midlands"/>         | <input type="text" value="B8 2NL"/> |
| <span>Update</span>                        |                                                    |                                     |

If this is just purely a quote and you do not want to raise this as an invoice number, please type 'QUOTE XXXX' in the invoice section box. The 'XXX' is something unique or specific to the client so when you are searching through the invoices raised you can easily find this so for example use their address/surname etc.

**Invoice Number** Generate

**For example: "Quote - LS15 7JR".**

*Once you have confirmation the client wishes to proceed with this, you can edit this and change it to an invoice number you enter manually or press the 'generate' button for it to automatically create.*

If you wish to generate an actual invoice for the client and know that they will be proceeding under this invoice number, you can either manually type an invoice number in or click the 'Generate' button for Affinity to create one for you.

## Invoice Number Generate

INV-LCAF-01

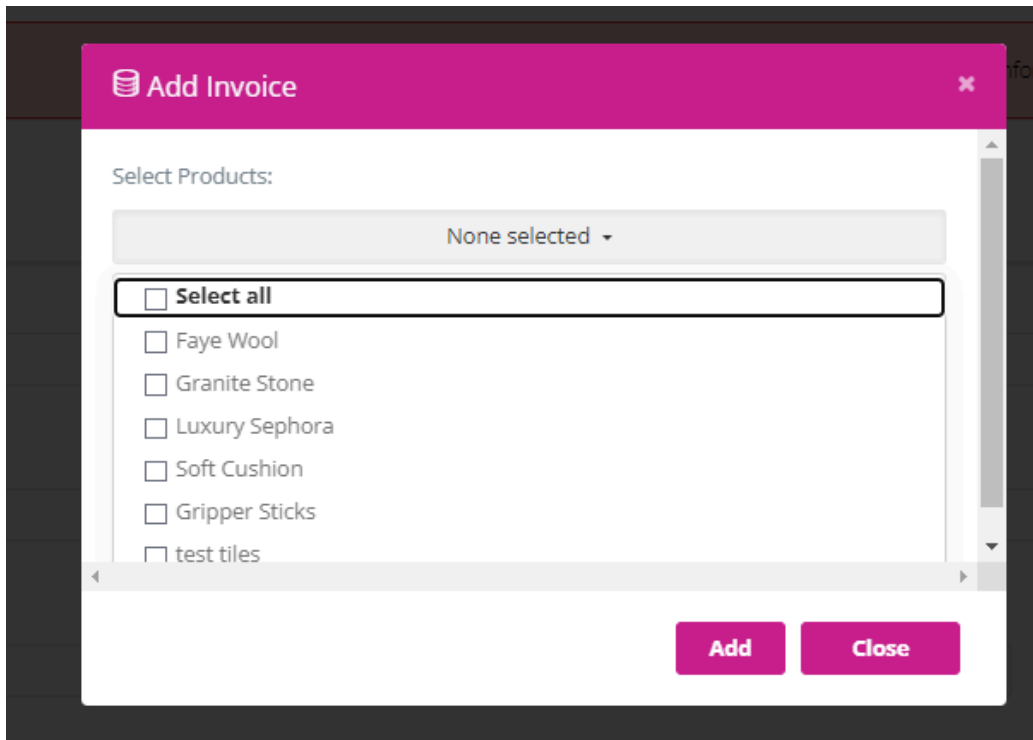

When you've finished, click the blue 'Next' button at the bottom of the screen to progress to product information.

You can then scroll down to the invoice items section. Click the magenta 'Add New Item' button to start adding items to be calculated.

### ☰ Invoice Items

➕ Add New Item

A pop-up window will appear containing a list of items to select, select the item you wish to add.

Fill out the room dimensions and scroll across to review the calculations:

| Title | Description | Length of Room(m) | Width of Room(m) |
|-------|-------------|-------------------|------------------|
| faye  |             | 6.2               | 4.3              |

|                              |                     |                |                                                                                       |
|------------------------------|---------------------|----------------|---------------------------------------------------------------------------------------|
| Total Area (m <sup>2</sup> ) | Enter Room Location | Total Price(£) |  |
| 26.66                        | Living Room         | 426.29         |                                                                                       |

Here you can fill out the description box specific to that product, this could be the desired widths, colour of choice by the customer - however you would like your store to use the description box etc. We advise during the adding product in the 'product attribute section'

that the description field is kept blank as whatever is inputted during this section, will transfer over onto the invoice screen.

If you are going to add a roll end product this is where you will need to input the price you have – see below:

| Title          | Description | Length of Room(m) | Width of Room(m) | Total Area(m <sup>2</sup> ) |
|----------------|-------------|-------------------|------------------|-----------------------------|
| Luxury Sephora |             | 5.5               | 3.2              | 17.6                        |

|                |                     |                |                                                                                     |
|----------------|---------------------|----------------|-------------------------------------------------------------------------------------|
| Total Price(£) | Enter Room Location | Total Price(£) |  |
| 0              | Master Bedroom      | 0.00           |                                                                                     |

As you can see it completes the total price at £0.00 as there has been no price set up in product attributes. Here please enter the price for the roll end product and this will then not calculate against the clients total area but instead be the final price it needs to be. See below:

|                |                     |                |                                                                                       |
|----------------|---------------------|----------------|---------------------------------------------------------------------------------------|
| Total Price(£) | Enter Room Location | Total Price(£) |  |
| 280.00         | Master Bedroom      | 280.00         |                                                                                       |

If there are any discounts to be applied, include this in the final section of the page:

Invoice Pricing

| Name                     | Value | Type       |
|--------------------------|-------|------------|
| subtotal (VAT exclusive) | 48.00 | value      |
| discount                 | 0     | percentage |
| vat                      | 12.00 | formular   |
| Amount £ (VAT Inclusive) | 60.00 |            |

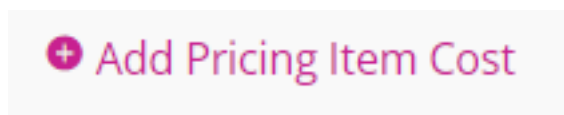

+ Add Pricing Item Cost
